(54) Title: DISPERSAL AIR SCRUBBER

(57) Abstract: The present invention embodies a Dispersal Air Scrubbing device. Dispersal Air Scrubbing is generally designed for indoor air purification. The air scrubber includes an elongated body having several packing casters at its lower portion and being provided with a fog guide at its upper portion and having air inlet apertures formed at both its sides; a double inlet blower mounted in the lower body shell defined at the lower portion of the body; an air chamber provided on the double inlet blower acting as a sound damper and; an ultrasonic transducer module mounted on the air chamber acting as an atomizer and having a hose discharging water vapor and connecting to the fog guide.
